Plantgate

How does it work?

Plantgate is a CLOUD service developed by CLIMASET srl to allow remote connection to plants **WITH OR WITHOUT** a static IP.

You can easily and safely reach your BOSS or pCOWEB SE, wherever you are in the world, using your **BROWSER** or with our **APP**.

Plantgate

Geolocation with a color map

Map

Simplicity

Each system is geolocated with an icon that shows its **position** and **status**:

BLACK: no configured device.

GREY: device not monitored.

RED: device not reachable.

YELLOW: device with alarm notifications.

GREEN: device OK.

Plantgate

Easy remote assistance

It is possible to **see the map and the system's status without logging in** to the Plantgate each time!

All you have to do is go the Map page, press the lower left red button and copy the **new external link** that will appear:

Nuovo link esterno alla mappa

<https://>

OK

The generated link will be until a new one will is generated.

Please note: for security reason we advise against publicly share the generated link.

Plantgate

The pyramidal structure

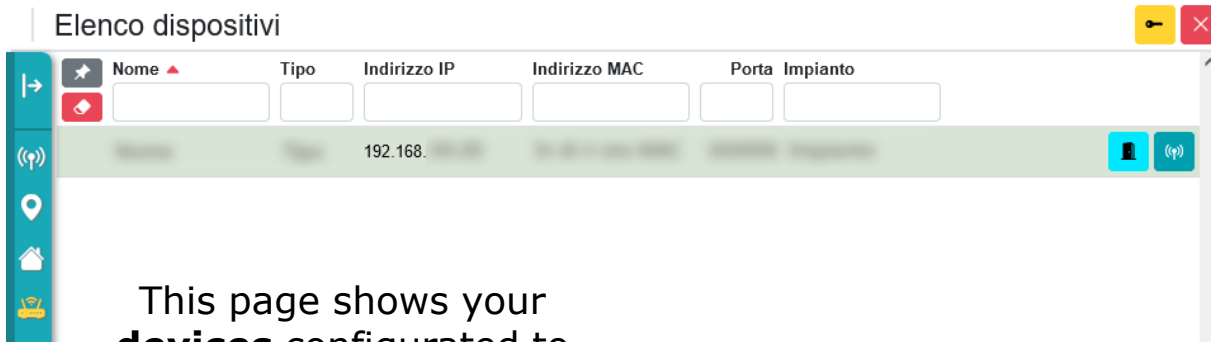

Plantgate has a pyramidal structure

- A) Hierarchically higher levels can access all lower levels systems.
- B) Each user can interact and read and/or write regulation parameters of his/her system.
- C) Personalization: for levels 1, 2 and 3 there is the possibility to have a custom URL and logo.

Plantgate

Devices list

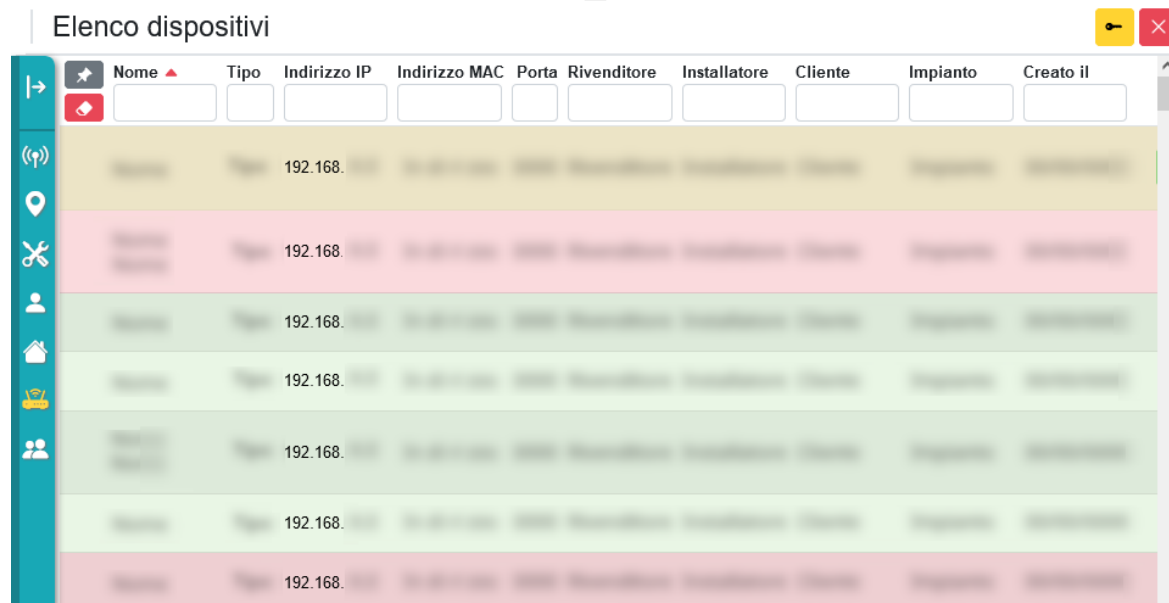

This page shows your **devices** configured to work with the Plantgate.

Rows change colors according with the **status** of the device.

More or less informations are displayed based on the user profile type.

Row color	Meaning
Grey	Not monitored
Red	Offline
Yellow	Alarmed
Green	OK
