Plantgate for a single board

Router connection without a static IP

pCOWeb is a webserver, supplied by Climaset srl, that is to be installed into the *BMS card* slot of the system's pCO controller. Thanks to its intuitive webpages, the user can very easily **see and change parameters** of the residential system.

CAREL
pCO controller

pCOWEB SE
CAREL

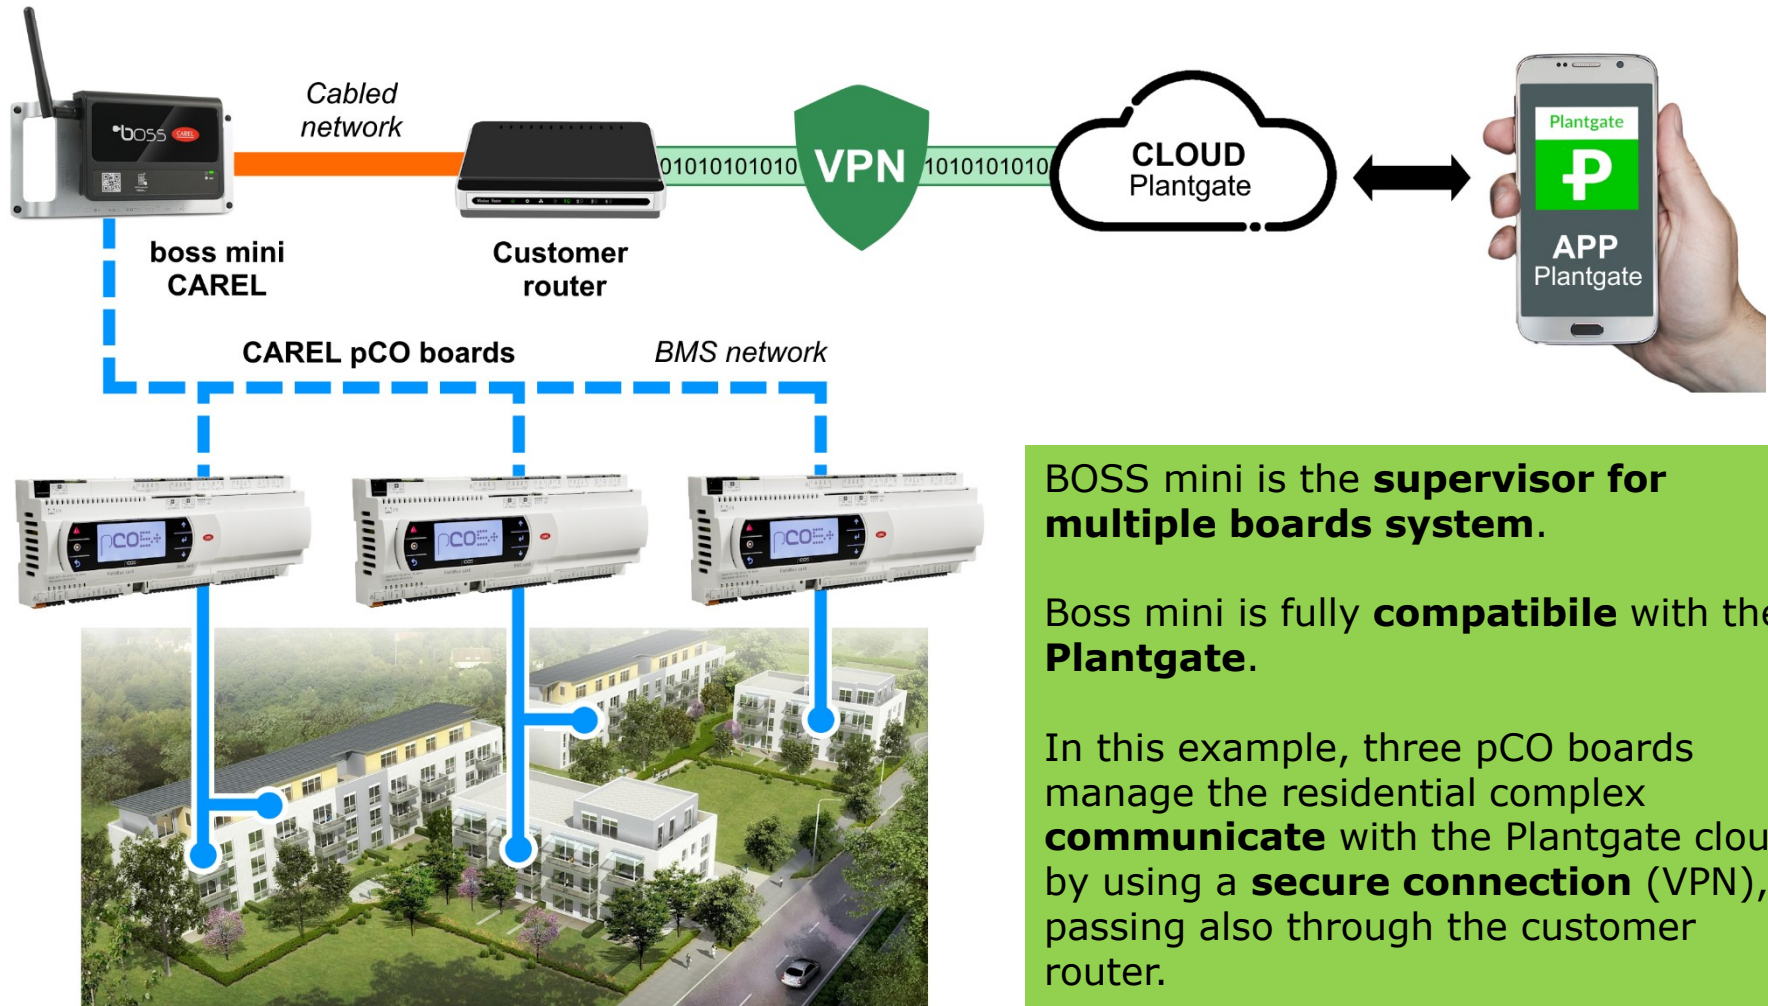

RUT100 is the autoinstalling kit, supplied by Climaset srl, for **safely** connecting the pCOWeb (through a *VPN encrypted connection*) to the customer router and then to the Plantgate CLOUD, **no configuration is needed on customer router.**

Once all connections are in place, the user can open the **Plantgate APP** e manage its system **from every part of the world!**

Plantgate for multiple boards

Router connection without a static IP

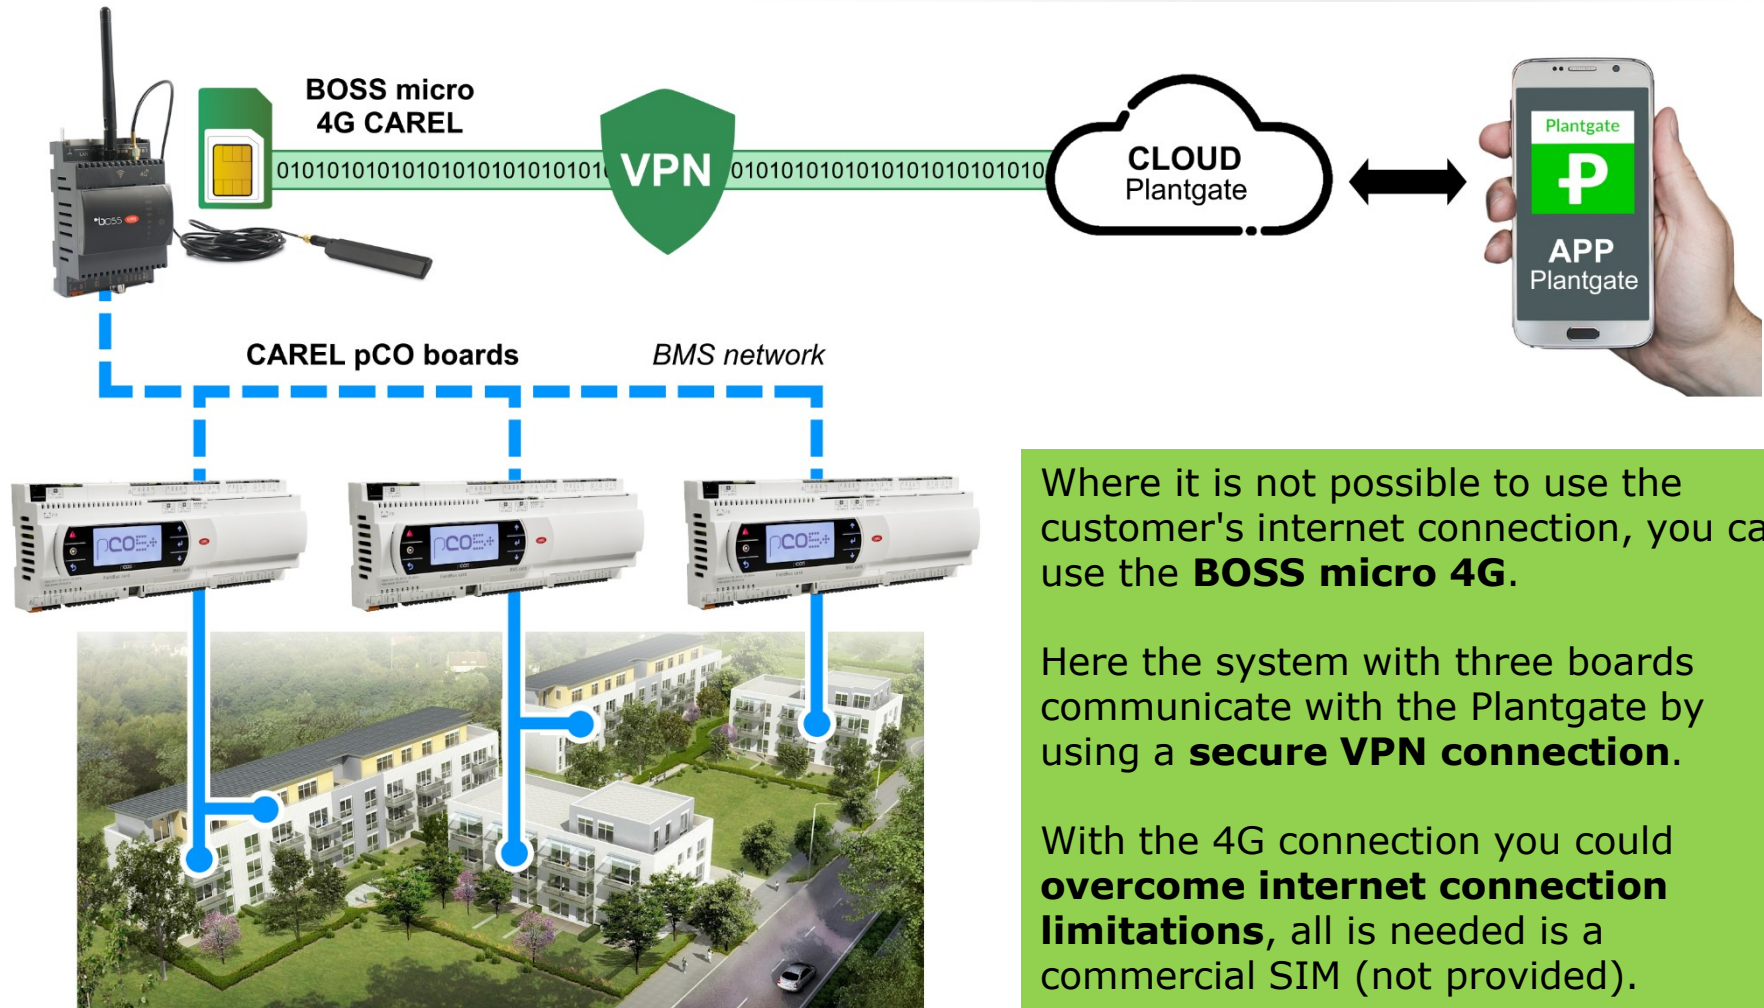

BOSS mini is the **supervisor for multiple boards system**.

Boss mini is fully **compatibile** with the **Plantgate**.

In this example, three pCO boards manage the residential complex **communicate** with the Plantgate cloud by using a **secure connection** (VPN), passing also through the customer router.

Plantgate for multiple boards

Connection without router with 4G SIM

Where it is not possible to use the customer's internet connection, you can use the **BOSS micro 4G**.

Here the system with three boards communicate with the Plantgate by using a **secure VPN connection**.

With the 4G connection you could **overcome internet connection limitations**, all is needed is a commercial SIM (not provided).
